

## 1Gbps fibre-optic broadband at Elektron and Switch House!

Hyperoptic, the UK's fastest residential internet service, is available at Elektron and Switch House. As the premiere residential provider of 1Gbps speeds, Hyperoptic has installed a fibre broadband service into the development enabling residents to enjoy speeds that are 68 times faster than the UK average of 14.7Mbps.

Whether it's a bundled phone and broadband package or just broadband you're looking for, there is a service that's just right for you. Residents have a choice of three hyper-fast speeds; 20Mbps, 100Mbps or 1Gbps and, unlike many other providers, Hyperoptic do not impose any limitations on speed or usage.
